

## RADICLE HEALTH ONLINE CURRICULUM PACKAGE

These are the concepts that you will learn about:

- How to identify cannabinoid and terpene profiles in chemovars to effectively treat illness and disease
- The endogenous cannabinoid system and a description of the cell receptors, enzymes, ligands, and drug transporters relevant to cannabinoid pharmacodynamics
- The absorption, metabolism, distribution, and excretion of cannabinoids
- Principles of assessment and dosing and best practices to consider when recommending cannabis for patients
- Considerations unique to the senior patient population
- Information about using cannabis to help treat nociceptive, neuropathic, and nociplastic pain
- Guidelines for helping patients identify and select safe products
- Genetic polymorphisms as data points for predicting patient response and for mitigating the risk of adverse effects

## HELPING YOU TREAT CONDITIONS WITH CANNABIS

Eloise Theisen is a board-certified Adult-Geriatric Nurse Practitioner. She received her Post Masters certification from University of Mass, Boston, an MSN in Nursing Administration from California State University, and a Bachelor of Science in Nursing from San Francisco State University.

Eloise was one of the first healthcare professionals (HCP) to bring a clinical dosing regimen to the cannabis space. She has met with over 5000 patients and has assembled the knowledge and data to use cannabis to treat a broad range of conditions and disease, especially those that commonly afflict seniors—pain, insomnia, anxiety, and depression. There are few HCPs nationally with the same level of expertise and experience.

### Radicle Health Curriculum

- A self-paced, recorded curriculum package for nurses and other healthcare professionals interested in learning about cannabis as a treatment modality.
- Includes over four hours of narrated PowerPoint presentations, PDF scripts, supplemental learning material, and self-assessment quizzes.

### Topics

- The Six Principles of Essential Knowledge
- The Endocannabinoid System
- Cannabinoid & Terpenes
- Extractions & Routes
- Geriatrics
- Chronic Pain
- Patient Assessment & Dosing
- Cannabis Pharmacology
